

# Tracking Mail

*Track 100% of your trackable letter, flat, and parcel mailings 100% of the time.*

## Snapshot of Benefits:

- Unique tracking URLs give you access to Track Mail and Real-Time QR code scans, from the very first IMB Barcode Scan all the way to final destination
- Supports direct mail and multi-channel marketing campaigns
- You can receive reports via email and text notifications
- Complete visibility of mailing as mail travels through the mail stream

USPS scans your mail and DigiLink's Mail Track solution reports the progress—from drop-off to delivery.

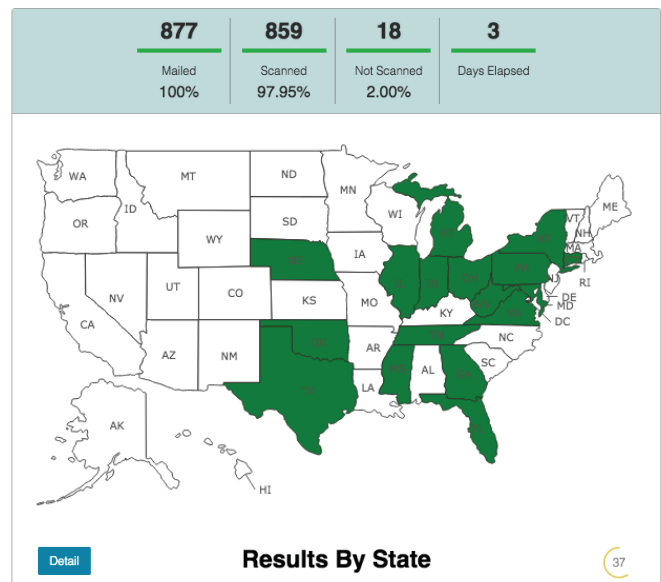

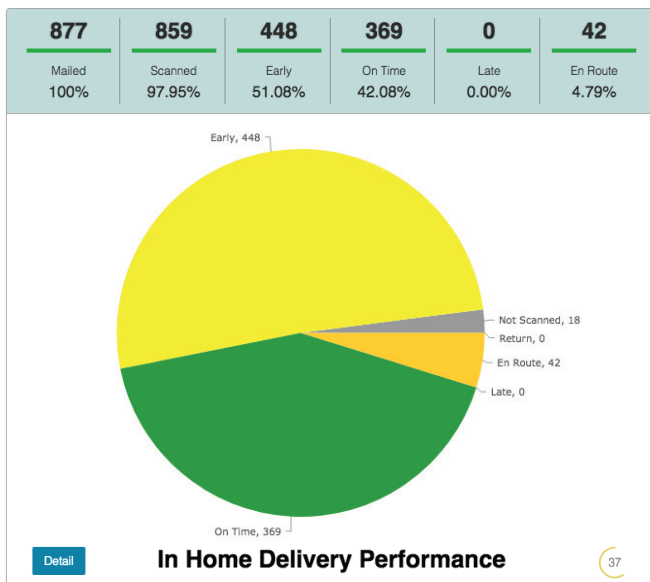

DigiLink will provide you a unique URL so you can begin tracking and viewing results from the very first IMB Barcode Scan (origin point) all the way to the final destination.

You can track 100% of your trackable letter, flat, and parcel mailings 100% of the time. Avoid date or delivery related disasters by identifying and resolving issues.

Online reports provide fast access to what is going on with the mailing and provides important QR scans data.

DigiLink's Mail Tracking solution can generate the Tracking URL and re-direct URL with Google Analytic parameters that are used with a QR Code encoder to generate a variable QR code image.

Call or contact us at [support@digilink-inc.com](mailto:support@digilink-inc.com) and tell us what marketing issues you would like to solve.
